

# Free Code Camp Twitch API Pass-through

## USAGE:

Replace the Twitch API **base URL** `https://api.twitch.tv/kraken` with `https://wind-bow.gomix.me/twitch-api`. Use this endpoint according to the [Twitch API documentation](#).

## NOTE:

This server caches data to lower the request rate. To prevent abuses this server accepts `GET` requests only, and serves only routes `/users/:user`, `/channels/:channel`, and `/streams/:stream`. These are more than enough to complete the challenge.
